Pitch

xivHarvest is a mobile application that keeps track of Unspoiled, Ephemeral, and Legendary Gathering nodes in Final Fantasy XIV. These nodes contain rare items that can only be gathered during specific windows of time. The main purpose of this app is to show what items are currently available and display the wait time for other items to become available via your phone!.

Description

xivHarvest contains a database of rare items that can only be found at timed gathering nodes in Final Fantasy XIV. Organize and keep track of these items while playing the game or being afk! Key features of this app:

- Display in-game time.
- Display pertinent item data. Such as image, name, type, location, availability window and required class.
- Calculate the number of minutes until an item is available during its in-game time.
- Filter and organize database to user's preference. By type, class, location, availability, etc.
- Push notifications when desired items are available.

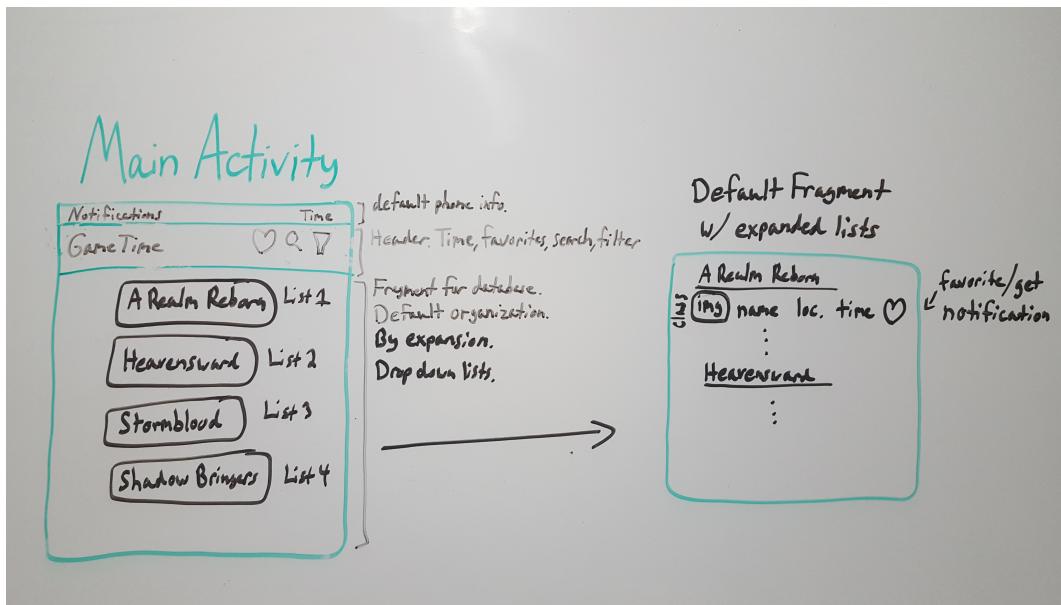

Figure 1: Main screen. Contains header and main fragment.

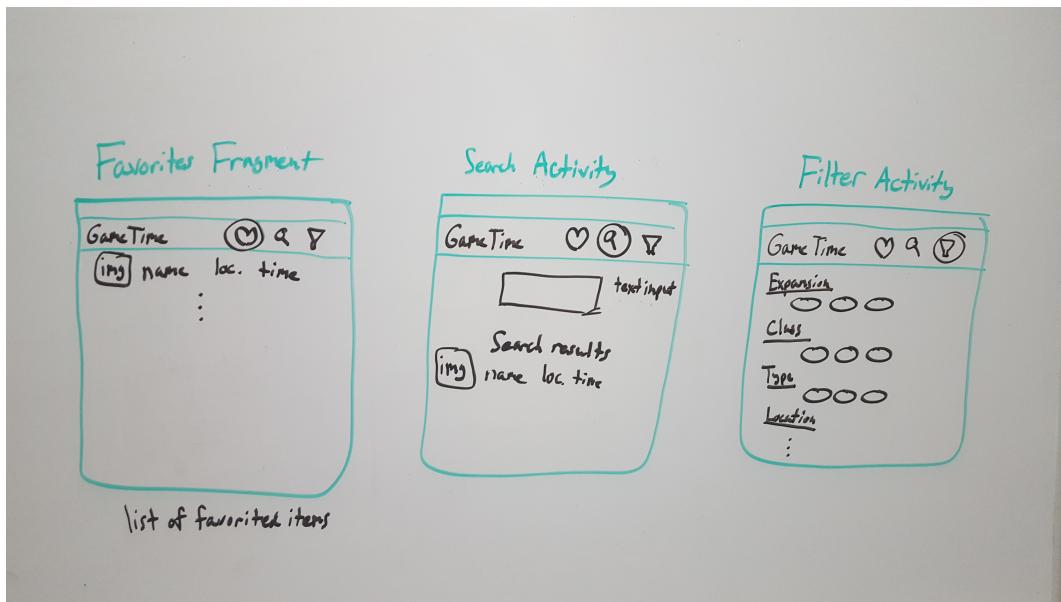

Figure 2: Searching and Filtering are on different screens, while the favorites list is a fragment.
